Additional Virtual Public Statement Hearing Set Regarding Alle-Catt Wind's Cattaraugus County Transmission Project

ALBANY — The New York State Public Service Commission (Commission) will hold an additional virtual public statement hearing on **Tuesday, June 28, 2022**, to receive public comments concerning Alle-Catt Wind Energy LLC's (Alle-Catt) application to construct, own, and operate a transmission line for a 340-megawatt wind electric generating facility in Cattaraugus County.

On February 10, 2021, Alle-Catt filed an application for a Certificate of Environmental Compatibility and Public Need and an associated Water Quality Certificate authorizing the construction, ownership, and operation of a transmission facility interconnecting the planned project to a new point of interconnection (POI) (Limelake Switchyard) that will be built adjacent to the existing Homer City-Stolle Road 345 kilovolt (kV) line owned by New York State Electric and Gas Corporation (NYSEG) and National Grid. The transmission facility will consist of a 10-mile 345 kV transmission line and a new POI switchyard.

The transmission line will connect the project's collection substation to the new POI switchyard that will be built adjacent to the existing Homer City-Stolle Road 345 kV line owned by NYSEG and National Grid. Except for approximately 500 feet where the transmission facility will be buried under the existing Homer City-Stolle Road line and enters the new POI switchyard, the transmission facility will be an overhead facility. The transmission facility will be located entirely within the towns of Yorkshire and Freedom, in Cattaraugus County.

By order dated June 3, 2020, the New York State Board on Electric Generation Siting and the Environment (Siting Board) gave Alle-Catt authority to construct, own, and operate a 340-megawatt wind electric generating facility. In doing so, the Siting Board determined that the project meets all statutory requirements for certification under Article 10 of the Public Service Law (PSL), including a finding that the project will be a beneficial addition to the electric generation capacity of the State.

On April 21, 2021, and March 2, 2022, Alle-Catt supplemented the application. On March 4, 2022, the Secretary to the Commission issued a letter finding that the application as supplemented complies with §122 of the PSL. Under New York State Law, the Commission may adopt or reject the Applicant's proposal, in whole or part, or modify it. In doing so, the Commission will consider input from the participating parties and the general public. An Administrative Law Judge (ALJ) is presiding over the gathering of public comments and all evidence related to the transmission facility. A public statement hearing will be held to obtain comments from the public concerning the application. As this

is not an opportunity for parties to relitigate issues already decided by the Siting Board in the above-referenced Article 10 proceeding, comments should pertain to the application and the requirements of Article VII of the Public Service Law.

Two virtual public statement hearings in this case were conducted on May 24, 2022. This is a notice of an additional, virtual public statement hearing.
